

Microconcrete Porcelanico Base

DESCRIPTION

Microconcrete Porcelanico Base is a coarse 2 ingredient quartz cement mortar with porcelain granules consisting of cement, selected high – quality aggregates, composites, inorganic pigments and artificial resins.

Origin: Spain

Granulometry: 0–0.3 mm

Total thickness: 2.5 mm

Proposed layers: 2

Areas of application: Smooth concrete, Warm concrete (floor heating), Wood, Tiles – Marble, Glass, Plasterboard – Cement bonded fiberboard. Indoor – Outdoor spaces. Pool – Flooring/Wall

Application: With a stainless spatula

Waterproofing: Mild passability (2 layers of impregnation) / High passability (2 layers of crystallization with a 2 ingredient polyurethane crystallizer)

Compression strength (7 days): 70N / mm²

Compression strength (28 days >): 95N / mm²

Tensile strength (28 days): 10N / mm²

Adhesion on concrete(28 days): 1,75 N / mm²

Application thickness: 1mm/layer

Package: 22 kg Bucket + resin 7.2 lt

Colorings: 40 standard colors and all NCS-RAL colors on demand

Texture – Appearance: Slightly porous surface with a few color variations
