

Microconcrete Porcelanico Fine

DESCRIPTION

Microconcrete Porcelanico Fine is a fine one ingredient quartz cement mortar with porcelain granules consisting of cement, selected high – quality aggregates, composites, inorganic pigments and artificial resins.

Origin: Spain

Total thickness: 2.5 mm

Proposed layers: 3

Areas of application: Smooth concrete, Warm concrete (floor heating), Wood, Tiles – Marble, Glass, Plasterboard – Cement bonded fiberboard. Indoor – Outdoor spaces. Pool – Flooring/Wall

Application: With a stainless spatula

Waterproofing: Mild passability (2 layers of impregnation) / High passability (2 layers of crystallization with a 2 ingredient polyurethane crystallizer)

Compression strength (7 days): 42N / mm²

Compression strength (28 days>): 55N / mm²

Tensile strength (28 days): 10N / mm²

Adhesion on concrete (28 days): 1.75 N / mm²

Application thickness: 1mm/layer

Packaging: 20 kg bucket

Colorings: 40 standard colors and all NCS-RAL colors on demand

Texture – Appearance: very smooth – closed surface with some veinings – spatula strokes (color variations)
