

MP3, MP5, MP7, MP35, MP51

The distinctive MP stands for Marble Plaster and the distinctive number 1-3-5-7 indicates the diameter of the marble granule (cutting) (0.1–0.3–0.5–0.7 mm respectively).

Texture: Ecological. Marble granules-limestone-natural resins – lime. Free to perspire. When applied on a wall crystallization is not necessary, they perspire freely regulating the apparent humidity of the space.

Thickness of material: 2.0~2.5 mm

Proposed layers: 2+1 *in the case of a substrate of tiles or warm concrete

Waterproofing: Mild passability (2 layers of impregnation) / Intense passability (2 layers of crystallization with a 2 ingredient polyurethane crystallizer)

Application: With a spatula

Substrates / Areas of application: Smooth concrete, Warm concrete (floor heating), Wood, Tiles-Marble, Glass, Plasterboard – Cement bonded fiberboard. Indoor – Outdoor spaces. Pool-Flooring/Wall

Package: Ready to use mortar in a bucket of 5/8/10/15 liters. Duration of workability after opening the package: 4 months

Colorings: 30 standard colors and all NCS-RAL colors on demand, they can also be colored while the work is being conducted with liquid coloring agents of the company with UV protection.

Texture – Appearance: According to the chosen diameter of the marble they can offer from very smooth to quite porous results.

MP1: Very smooth, to be applied only on a wall because it cannot be completely waterproofed.

MP3: Very smooth. Can also be applied on floorings.

MP5: Small porous.

MP7: Large porous.

*Possibility to combine different granulometries for results with unique texture.

*It is clarified that porous refers to the appearance. All systems can be completely waterproofed.
