

Microconcrete Fine

DESCRIPTION

Microconcrete Fine is a one ingredient quartz cement mortar consisting of concrete, selected high – quality aggregates, inorganic pigments and artificial resins.

Origin: Satine Spain

Granulometry: 0~0.1 mm

Total thickness: 2mm

Proposed layers: 1(base) + 2

Areas of application: Smooth concrete, Warm concrete (floor heating), Wood, Tiles-Marble, Glass, Plasterboard – Cement bonded fiberboard. Indoor – Outdoor spaces. Pool-Flooring/Wall

Application: With a stainless spatula

Waterproofing: Mild passability(2 layers of impregnation) / High passability (2 layers of crystallization with a 2 ingredient polyurethane crystallizer)

Compression strength (7 days): 39N / mm²

Compression strength (28 days >): 50N / mm²

Tensile strength (28 days): 12N / mm²

Adhesion on concrete(28 days): 1 N / mm²

Package: 15 kg bucket + resin 7.2 lt

Colorings: 40 standard colors and all NCS-RAL colors on demand

Texture – Appearance: very smooth– closed surface with a few veinings-spatula strokes (*color variations)
